MICROCRYSTALLINE GLAZE PORCELAIN

Product Characteristics

Diamond Crystalline Stone tile is a combination of brand new technology and crystals. Grains on the surface are like shining stars, natural and colorful. The diamond-like patterns, with subtle texture and delicate structure, spark beautifully and look nicely warm. Apart from the incomparable glossiness and abrasive and resistance, the microcrystal stone tile series is also known for excellent self-cleanness and skid resistance.

6B6131

Product Characteristics

Glazed Polished Tile are produced with special multi-layers technique and fully leaking under-glazed color figure technique. The waved grains distribute beautifully on the surface as if it's an elaborate oil painting with significant 3D effect and lively colors. The all glazed series is refined and extravagant, slightly transparent just like a piece of jade. And it's widely used in private residences, business areas and project regions.

Thickness: **8.8mm**

Product Characteristics

Polished Tile are applied to the latest design to make more exquisite lines, softer color and clearer grains. This series shows the harmonious blended texture of gold and jade, which makes the tiles superior and exceptional. Public places like private clubs, banks, and hotels all lie in the scope of application of polished tiles.
